ABOUT ME

QA Engineer with 4+ years of experience specializing in manual and automated testing for web-based applications. Proven ability to design and implement effective test strategies, ensuring high-quality releases in Agile environments.

Hands-on experience with automation tools (Selenium, Cypress), API testing, and test framework maintenance. Skilled in identifying defects, and improving testing processes.

Strong collaboration with development, product, and DevOps teams, with a focus on end-to-end quality and user experience.

EDUCATION

Bachelor Degree in Information and Communications Technologies
Instituto Tecnológico de Pachuca

2017 - 2022

WORK EXPERIENCE

Software Quality Tester Sr. Associate | NTT Data

Jan 2024 - April 2026

- Impact: Increased automated test coverage by 30%, significantly reducing manual regression time by approximately 10 hours per sprint.
- Execution: Performed high-level functional and cross-platform testing on internal enterprise systems for Windows, iOS, and Android.
- Quality Assurance: Executed daily smoke tests to validate core system stability, maintaining a 99% production readiness rate post-release.
- Defect Management: Orchestrated defect tracking via Azure DevOps, collaborating with DevOps and Dev teams to achieve a 20% faster resolution cycle.
- Compliance: Conducted overnight deployment testing and documented comprehensive test evidence for strict compliance standards.

QA Manual Tester | Softtek

Jan 2022 - Jan 2024

- Impact: Identified and documented over 50+ critical defects before production, ensuring a high-quality launch for a major sales web platform.
- Accessibility: Directed usability and visual accessibility testing on mobile and desktop devices, ensuring inclusive design for diverse user groups.
- Collaboration: Integrated into Agile/Scrum squads to deliver sprint goals on time, providing key QA insights that reduced bug reopening rates by 15%.
- Verification: Managed end-to-end bug lifecycle, from initial identification to final retesting and verification of fixes.

SKILLS

- Color blind
- Testing Fundamentals
- Defect magement
- Time manage
- Requirement analysis
- Communicative
- API Testing
- High adaptability
- Attentive to detail
- Cross plataform Testing
- Agile Learning
- Prorization

TECHNICAL STACK

- Python
- Java
- Javascript
- SQL
- Azure DevOps
- Jira
- Agile/SCRUM
- STLC
- Postman
- Selenium
- WebDriverIO
- RobotFramework
- Playwright
- GCP
- AWS
- Git

CERTIFICATIONS
